The specificity of each primer solution of the kit has been tested against 48 well characterized IHWC cell line DNAs.

No DNAs carrying the alleles to be amplified by primer solutions 6, 8, 19, 21 and 23 were available. The specificities of the primers in primer solutions 6, 8 and 23 were tested by separately adding one additional 5'-primer, respectively one additional 3'-primer. In primer solutions 19 and 21, it was only possible to test the 5'-primer, the 3'-primer was not possible to test. In primer solutions 1, 2, 3 and 15 one or two 3'-primers were not possible to test, and in primer solution 23, one 5'-primer was not possible to test. One additional 5'-primer in primer solution 15 was tested by separately adding one 3'-primer

Results: No false positive or false negative amplifications were obtained.
